Education

Birzeit University

Bachelor's degree, Computer Engineering

Birzeit, PA

(2020 - Present)

- Coursework: Data Structures, Algorithms, Web Development, DATA BASE SYSTEMS, Software Engineering, AI
- Gained proficiency in developing dynamic web applications using PHP, CSS, and HTML.
- Developed strong analytical and problem-solving skills through extensive coursework in data structures and algorithms.
- Hands-on experience in managing and querying databases with MySQL.
- Acquired knowledge of software development life cycle and best practices in software engineering.
- Explored machine learning models and artificial intelligence techniques, including practical applications in real-world scenarios.

Experience

Asal Technologies

Backend Developer

Rawabi, PA

July 2024 - Sep 2024

- Gained understanding of REST architecture and APIs, including CRUD operations, pagination, versioning, error handling, and unit testing.
- Worked with MongoDB, focusing on querying and database optimization.
- Used Postman for API testing and automation of workflows.
- Developed applications with ASP.NET and optimized database operations using LINQ queries.
- Managed CI/CD pipelines and collaboration through Azure DevOps.
- Implemented asynchronous messaging with RabbitMQ for distributed systems.

Skills

- Java Spring Boot framework
- ASP.NET Core
- RESTful API Development
- MongoDB
- Software Development
- MySQL
- Microservices Architecture
